# You've been identified as a close contact of someone who has tested positive for COVID-19 or someone with COVID-19 symptoms. Now what?

Does the COVID-19 positive/symptomatic person live with you?

No → **Do you have COVID-19 symptoms?**

Yes

- Self-isolate immediately for at least 5 days (if fully vaccinated or under 12)** or 10 days (if **not** fully vaccinated or immunocompromised) after symptom onset and until you have no fever and other symptoms are improving for 24 hours (or 48 hours for gastrointestinal symptoms).
- Get tested if eligible and follow the guidance for cases.

No

- Self-monitor for symptoms for 10 days after your last exposure.**
- Report your exposure to your employer and follow any work restrictions.
- If you develop symptoms, get tested if eligible and self-isolate immediately.

Yes

- If you **do not** meet the below criteria you must self-isolate for the same amount of time as the positive/symptomatic person. If any of the following apply to you, you do not need to self-isolate**:
  - You have previously tested positive for COVID-19 in the last 90 days
  - You are 18+ and boosted
  - You are under 18 years old and are fully vaccinated
- If you develop symptoms, continue/start to self-isolate and get tested if you are eligible. Follow the guidance for cases.
- If anyone else in your household develops symptoms, if you are isolating and still have no symptoms then you should extend your self-isolation until the newly symptomatic person has finished isolating.

Wear a well-fitted mask in public, physical distance and maintain other public health measures for 10 days following your last exposure if leaving home. You should **NOT visit or attend work in any highest risk settings and not visit individuals who may be at higher risk of illness (i.e. seniors or immunocompromised) for 10 days after your last exposure.
